#### **DETAILED ACTION**

#### Continued Examination Under 37 CFR 1.114

- 1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 22, 2003 has been entered.
- 2. The amendment filed September 22, 2003 has been entered.

## Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Application/Control Number: 09/134,854

Art Unit: 3724

4. Claims 1-8, 14-18, 20-23, 79, 83 and 84 are rejected under 35 U.S.C. 103(a) as being unpatentable over Conneally, pn 4,696,213, in view of Delta model 36-906 (hereafter Delta **'906)**.

Conneally discloses a table saw with almost every structural limitation of the claimed invention but lacks an adjustment mechanism mounted on the infeed extension thereof to selectively adjust an elevation of the infeed extension. However, the Examiner takes Official notice that such adjustment mechanisms are old and well known in the art and provide various known benefits including facilitating the adjustment of the squareness of the fence body to the table, specifically the squareness of the abutment/guide surface of the fence body to the work surface of the table. Delta '906 discloses one example of such an adjustment mechanism. Therefore, it would have been obvious to one having ordinary skill in the art to provide such an adjustment mechanism on the fence of Conneally for the well known benefits including that described above.

### Response to Arguments

5. Applicant's arguments filed September 22, 2003 have been fully considered but they are not persuasive.

Art Unit: 3724

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Clark Dexter whose telephone number is (703) 308-1404. The examiner's typical work schedule is Monday, Tuesday, Thursday and Friday, and he can be reached during normal business hours on these days.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Allan Shoap, can be reached at (703)308-1082.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703)308-1148. The fax numbers Technology Center 3700 are: after-final responses - (703)872-9303; other formal/official papers - (703)872-9302. The fax number for informal/draft papers - (703)305-9835.
